Presentation description

- Some general statistical data about Estonian forest and timber industries related issues
- Overview of ongoing research project about innovation and entrepreneurship in Estonian forest management

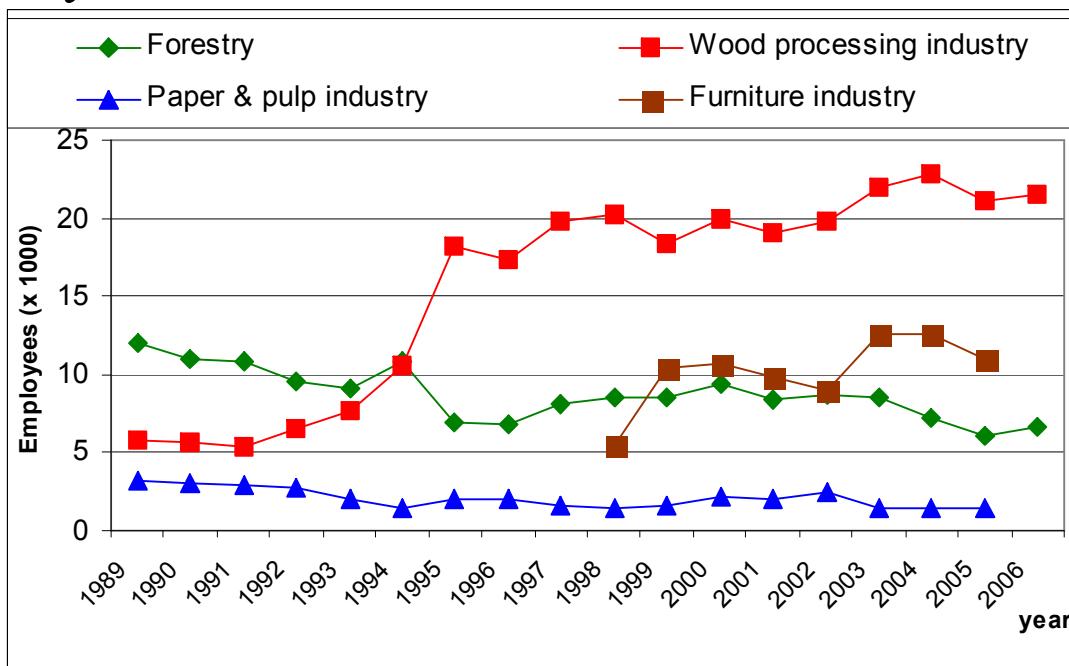

Basic statistical data

- Share of forest industry from gross domestic product (by current prices) in 1993–2005

Basic statistical data

- Employment

Forecast – in wood processing industry the number of employees is decreasing, mainly due to the lack of roundwood

Entrepreneurs in statistical profile by legal form

Agriculture, hunting and forestry together

Year	Total number	Sole proprietor (FIE)	General partnership (TÜ)	Limited partnership (UÜ)	Private limited company (OÜ)	Public limited company (AS)	Commercial association (TÜ)	Branch of foreign company
2002	10 888	9 251	7	29	1 321	171	109	0
2003	8 746	7 087	7	7	1 398	150	97	0
2004	9 012	7 224	7	9	1 569	121	82	0
2005	9 418	7 518	5	7	1 689	113	86	0
2006	9 178	7 249	4	7	1 747	92	79	0

- Economically active sole proprietors registered in the Commercial Register, excl. economically active sole proprietors registered only in the Register of Taxable Persons.
- source – Estonian Statistical Office www.stat.ee

Entrepreneurs in forest and timber sector

- Source – yearbook of Forest 2005

Activity	2002	2003	2004	2005
	Number of enterprises			
Forestry, logging and related activities	373	407	455	524
Manufacture of wood and wood products	964	1 027	1 071	1 042
Manufacture of pulp, paper and paper products	48	47	47	52
Manufacture of furniture	329	379	387	

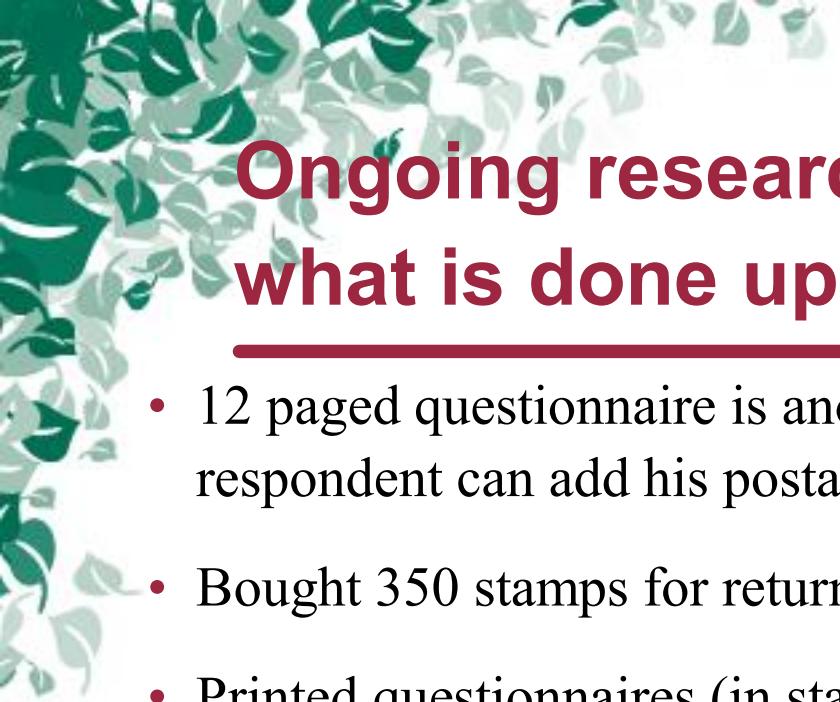

Ongoing research project and some preliminary intermediate results

- Research project about innovation and entrepreneurship in Estonian forestry and forest management
- Target – private forest sector
- Research is financed by Estonian Environmental Investment Centre (KIK)

Ongoing research project and some preliminary intermediate results

- Questionnaire was in a big extent adopted from the EFI Project Centre INNOFORCE forest holding survey, carried out in 7 Central-European countries (AT, CE, DE, HU, IT, SK, SI) in 2002 – 2003.
- INNOFORCE survey results are published in a book “Innovation and Entrepreneurship in Forestry in Central Europe”, written by Ewald Rametsteiner, Gerhard Weiss and Klaus Kubeczko in 2005. (EFI Research Report 19)

Ongoing research project – what is done up to now

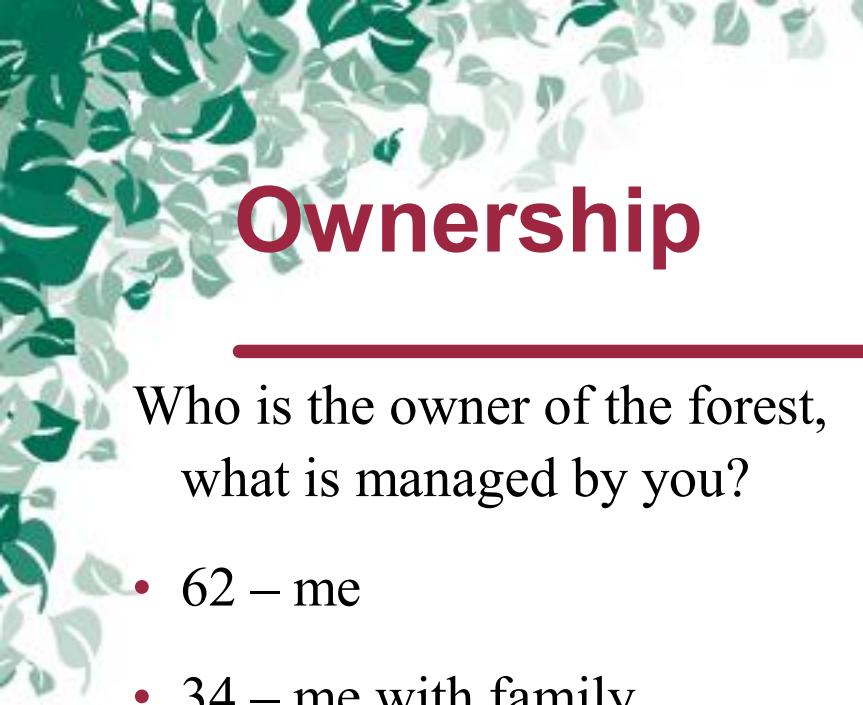

- 12 paged questionnaire is anonymous. For getting results the respondent can add his postal or e-mail address
- Bought 350 stamps for return letters
- Printed questionnaires (in stamped envelope with return address) were distributed in different forestry related seminars, forest union members meetings, distributed personally to forest owners or forest managers.
- Later the WEB based questionnaire was set up in Eformular server. The information about the survey was published in phorum of the homepage of Estonian private forestry (www.eramets.ee), the link to the questionnaire was E-mailed to different sources

Preliminary results

- As the response rate has been rather low, we will try to get more answers in September 2007. That's why in current presentation very deep analyse is not done.
- Up to now we have 105 answers (ca 90 to printed questionnaires, 15 from web based survey).
- Not all the questions are answered by the respondents

General information

- 99 (of 105) indicated their gender: Men 79, women 20
- 102 indicated their age. The average is 44, youngest is 22 and oldest 77. Almost all the ages between 22 and 77 are represented
- 103 indicated their education: 45 foresters with higher (univ) education, 28 other higher education, 16 with professional forestry training , 11 secondary education and 3 primary education
- 58 living in countryside, 30 in small towns and 9 in capital Tallinn

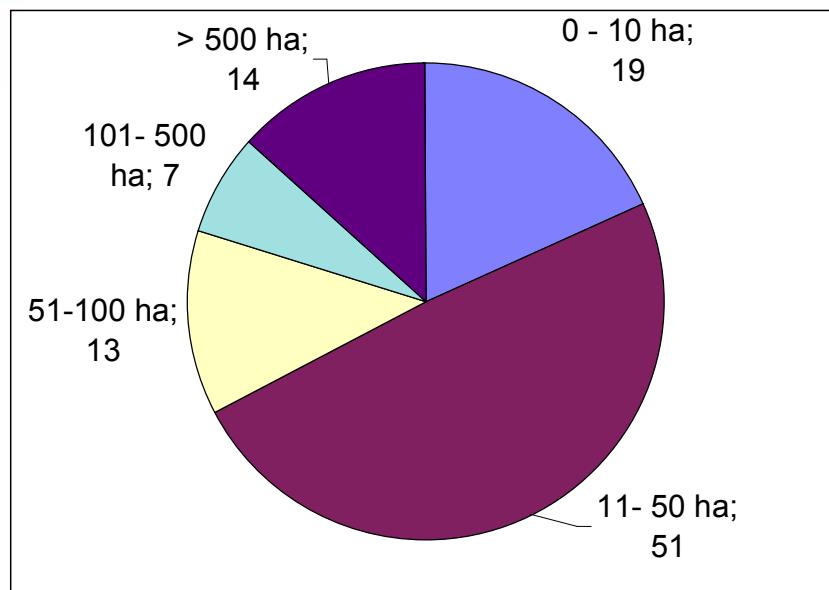

Ownership

Who is the owner of the forest,
what is managed by you?

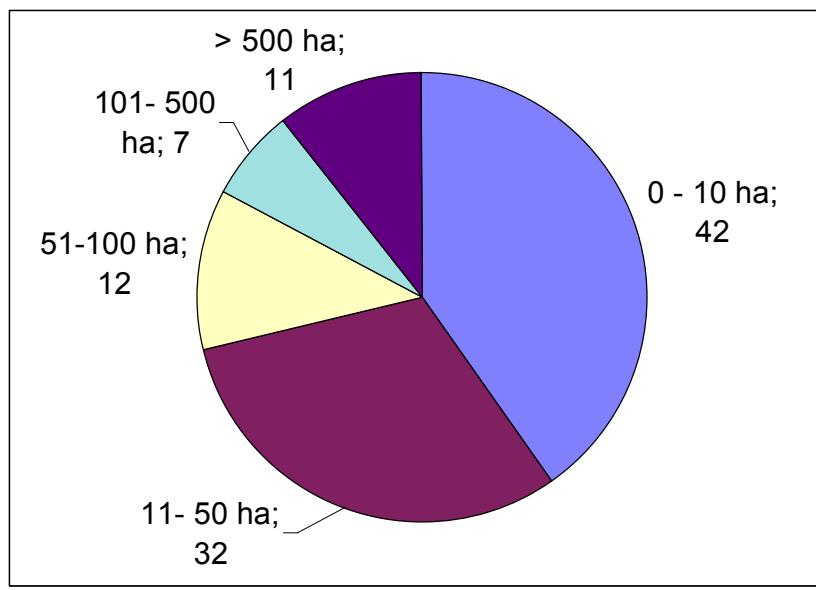

- 62 – me
- 34 – me with family
- 10 - the business enterprise,
controlled (owned by me)
- 1 -some kind of union
- 6 – State; 7 others

Forest area

Forest area owned/ under management

Forest area under active management (economically important)

How do you manage your forest (How the forest works are done)?

14 – with full time employees

6 – with part-time employees

32 – temporary workers or sub-contractors

51 – family members

22 – myself, without additional help

54 respondents are the members of some kind of forest owners union, society or co-operative

What are your economic goals for forest management within the next 10 years?

Increasing annual income	24
In a long-run period to get the better quality assortments by taking care of forest (logs, pulpwood)	62
Keep the property without big changes	32
Sell the property	2
Leave the forest, avoid to take care of forest	1
Clearfelling and regeneration	26
Make some first thinnings and then to keep until next felling	41
Other goals, which ?	15

What strategies do you pursue to reach these goals?

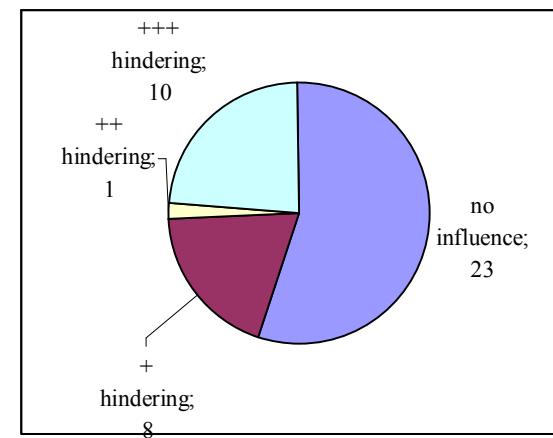

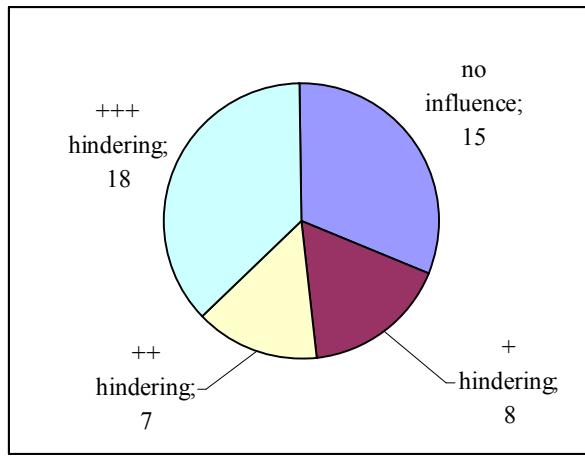

spezialisation on few products	5
diversification of products	11
Start the marketing of products and services	10
Improve the marketing of products and services	14
Increase the marketing of products and services	7
outsourcing of work	7
rationalisation	14
co-operation with forest unions	41
Buy more forests	25
Rent more forests	4
Sell forest properties	2
Continue business as usual	54
other	7
